

Centre for Alternative Technology
Canolfan y Dechnoleg Amgen

C.A.T. is an education and visitor centre demonstrating practical solutions for sustainability. We cover all aspects of green living: environmental building, eco-sanitation, woodland management, renewable energy, energy efficiency and organic growing. Most of the timber in the garden is from C.A.T.'s sustainably managed woodland. The den will have a new home in C.A.T.'s play area.
